Those shown on our first page are our special collection for this year, 1901, and we think will be found unusually attractive and satisfactory

## The New Russelia Elegantissima

is a most charming plant for pot culture and winter bloom. It has long, slender, wiry stems, which grow in graceful drooping masses, like flowing hair, and covered all over with long tubular flowers of the brightest scarlet color. It is a new and rare plant, particularly suitable for pots, baskets and vases. It blooms the whole year, but most profusely during the winter and spring months, when the well-filled pots look almost like fountains of bright scarlet and deep green. It is easy to grow and sure to bloom, and gets more beautiful as it grows older. Strong plants. 15 cts. each, \$1.50 per doz., postpaid.

## New Ageratum--Lady Jane Gray

Among all the Ageratums this elegant new variety is claimed to be the very finest. The plant grows erect and bushy, 10 to 12 inches high, and is covered all over with its lovely deep blue flowers like fluffy balls of sky blue silk. It grows very easily and blooms all the time, so that it is hardly ever without flowers, winter or summer. When done blooming in the house, plant in the flower bed, and it will bloom all summer. 15 cts. each, 2 for 25 cts., \$1.25 per doz., postpaid.

## The Beautiful Ostrich Feather Palm (Areca Lutescens)

This is one of the grandest and most beautiful palms for house culture ever offered. The foliage is rich glossy green, with bright yellow stems, exceedingly graceful in habit and form; hardy and easily grown; requires no special treatment; will thrive and do well in parlor or living room, and you will have the satisfaction of owning one of the choicest house plants it is possible to have; will live for many years, and grow larger and more beautiful year by year. Nice young plants, same as sent with this collection, 25 cts. each; 10 to 12 in. high, 35 cts. each, postpaid; larger size, 50 cts., by express.

**SPECIAL OFFER :::** The above set of three: One new Russelia Elegantissima, one new Blue Ageratum—Lady Jane Gray, one beautiful Ostrich Feather Palm (Areca Lutescens)—only 50 cts., postpaid, or three collections for \$1.25. ## Primula Sinensis Fimbriata (Fringed Chinese Primrose)

PRIMULA SINENSIS FIMBRIATA

The Chinese Primrose is well known as one of the most beautiful and satisfactory house plants for winter flowering. It is never troubled with insects, and will thrive and bloom beautifully in a window where there is but little sun and few other plants would grow. They are certainly among the brightest and best of all winter flowers. We offer strong, vigorous plants, many already in bud and bloom; they are a very choice strain. We have them in fine mixed colors, including pure white, rose pink, scarlet, spotted, striped and blue, also white and crimson, separate. Plants are quite hardy, require very little attention, and should bloom all winter. 15c. ea., 2 for 25c., 6 for 65c., \$1.25 per doz., postpaid.

## BULBS FOR WINTER FLOWERING

**W**E are glad to again ask your kind attention to our splendid stock of **Imported Bulbs for Fall Planting**. Bulbs are the sweetest and most beautiful of all flowers for winter blooming, the easiest to grow and surest to bloom. Lovely Easter Lilies, Hyacinths, Tulips, Narcissus, Crocus, Scillas, etc., besides being entirely hardy in open ground, bloom beautifully during winter when planted in pots or boxes in the house, and are among our very finest winter bloomers. **Bulbs for House Culture and Winter Bloom should be Planted as Early as Convenient, from September to January.** Any soil that is suitable for other plants will grow nice bulbs; old well-rotted manure is the best fertilizer. Pots or boxes of any convenient size may be used. Small bulbs can be set very close together, sometimes several in a pot; larger ones need room in proportion to their size. Do not plant too deep, one inch under ground is about right for house culture. When potted, water thoroughly and set away in a cool dark place for two or three weeks to rest, and give the roots time to start, then take to the living room or wherever they are to remain; they do not require much heat, an upstairs room suits them nicely. Water only when they need it, but be sure they do not get dry at the bottom. They will soon begin to bloom and then their lovely flowers and exquisite fragrance will surprise and delight all who see them.

**BULBS IN OPEN GROUND.** Tulips, Hyacinths, Narcissus, Crocus, Snow Drops, Scillas, Ixias, Sparaxis, etc., are the finest bulbs for fall planting in the flower bed, as they are entirely hardy and make a splendid display of gorgeous flowers very early in spring, almost before the snow is gone. Their flowers are exquisitely beautiful and always highly valued because they come before all others. The culture is very simple, and what is better, they are absolutely sure to bloom. Other flowers may fail but bulbs never.

Bulbs do not require very rich soil and will succeed well in any ordinary ground; when convenient, it is well to spade up the ground, so that it will be a little higher than the surrounding surface, and keep water from collecting on it. If the soil is poor, a liberal quantity of old, well-rotted manure should be spaded in or applied to the top as a mulch.

**TIME TO PLANT.** September, October, November and December are the best months for planting bulbs in the open ground. Set them from one to six inches apart, and from one to five inches deep, according to size and variety, and firm the earth well around them.

**WINTER PROTECTION.** These bulbs are entirely hardy and will do without any protection, but if convenient to give the bed a light covering of leaves or litter after planting, the flowers will come earlier and be finer. The covering should be removed gradually as soon as the plants show through in the spring.

**TREATMENT AFTER BLOOMING.** When pot bulbs are done blooming they can be set away in any cool, dry place and left a few weeks to mature, after which they may be shaken out of the soil and stored away till time to plant again in the fall. They may not make as fine flowers the second season as the first, but will usually do quite well for two or three years. Bulbs in open ground, when done blooming and well matured, may be lifted and dried off, and then treated exactly like those from pots.
